

1. Sample Size = 100, Standard Deviation= 100, number of simulations = 1000

Window = 0.3*bandwidth

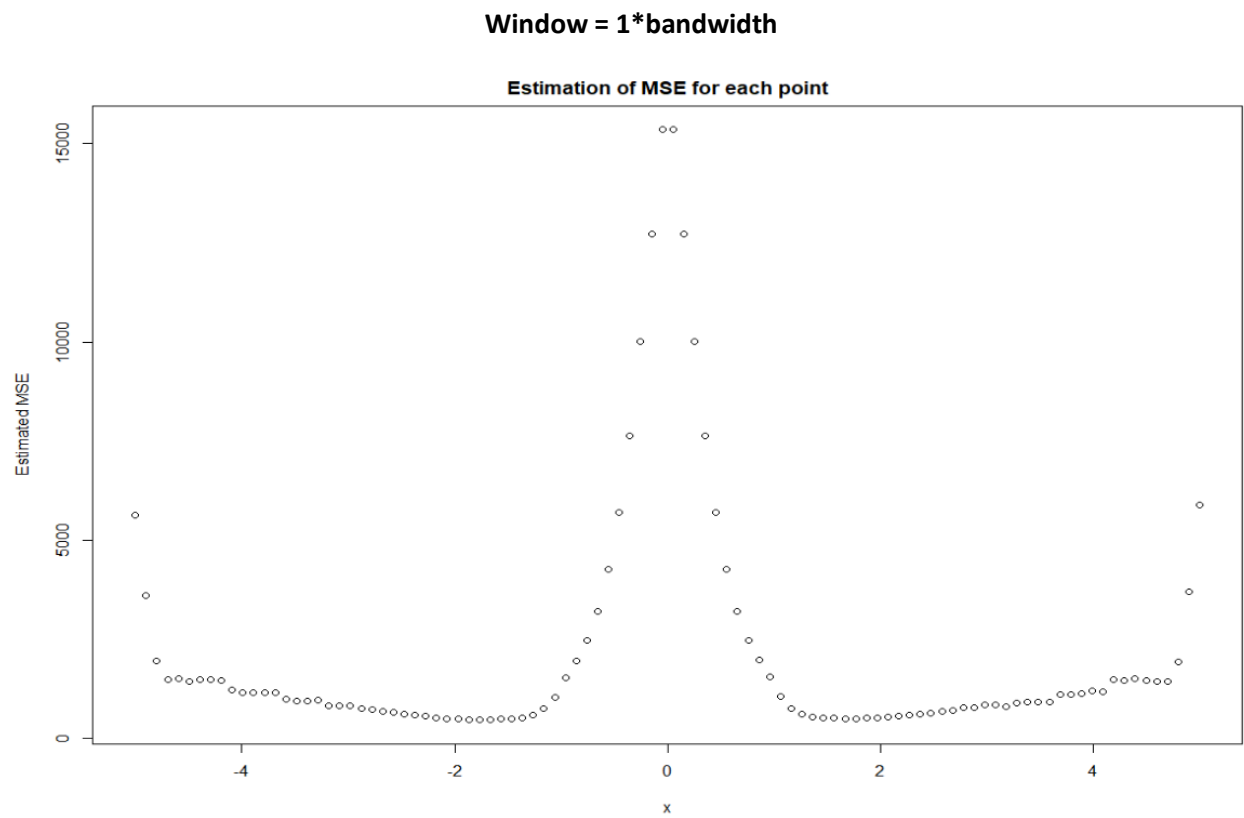

Window = 0.5*bandwidth

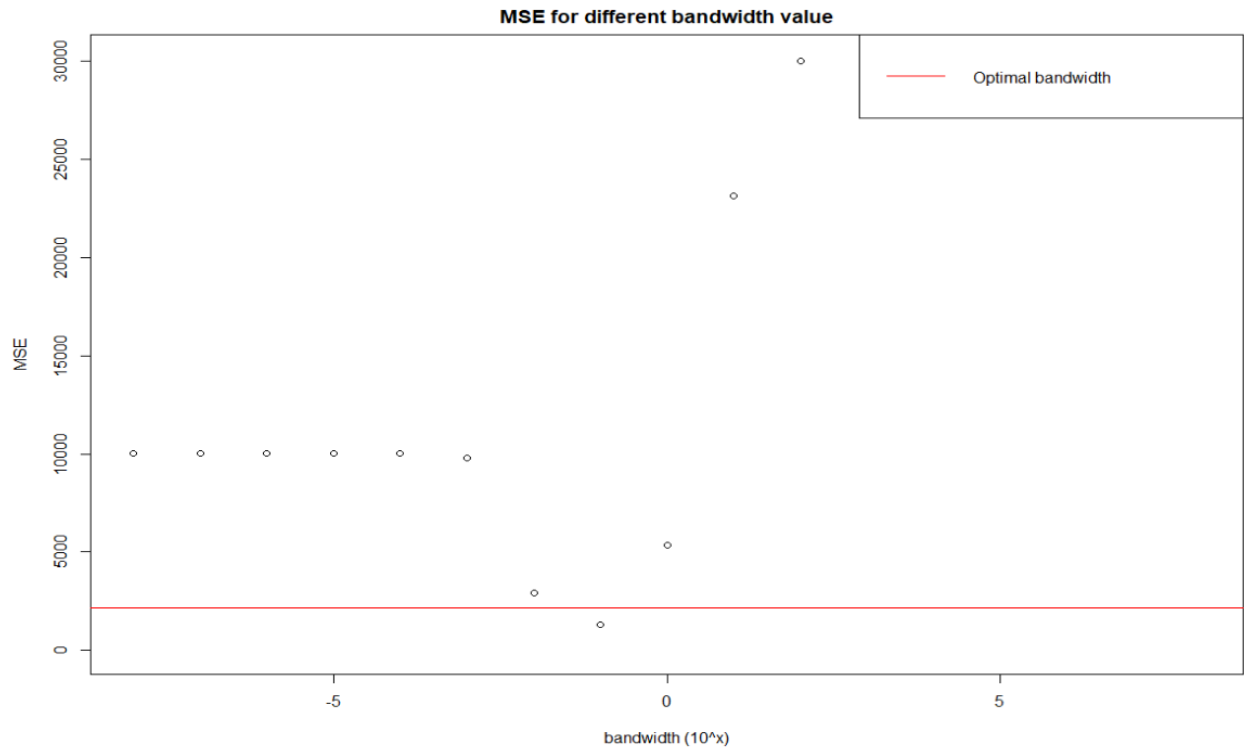

Window = 0.8*bandwidth

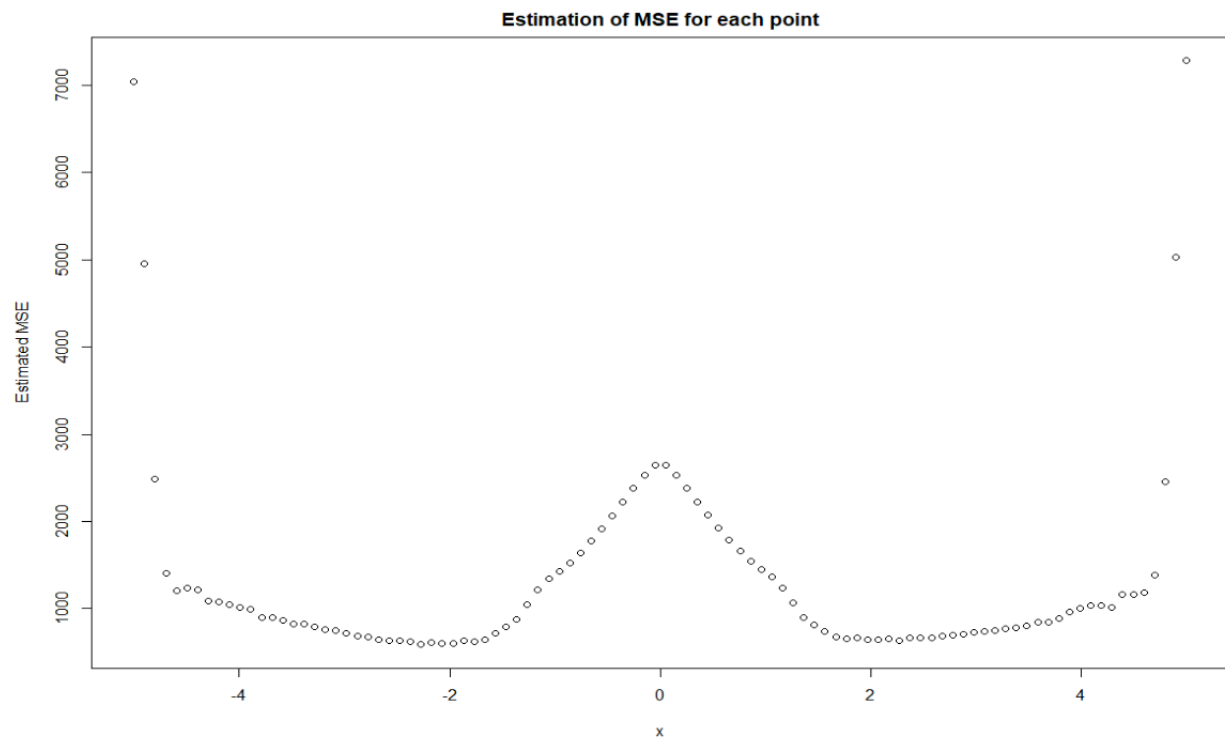

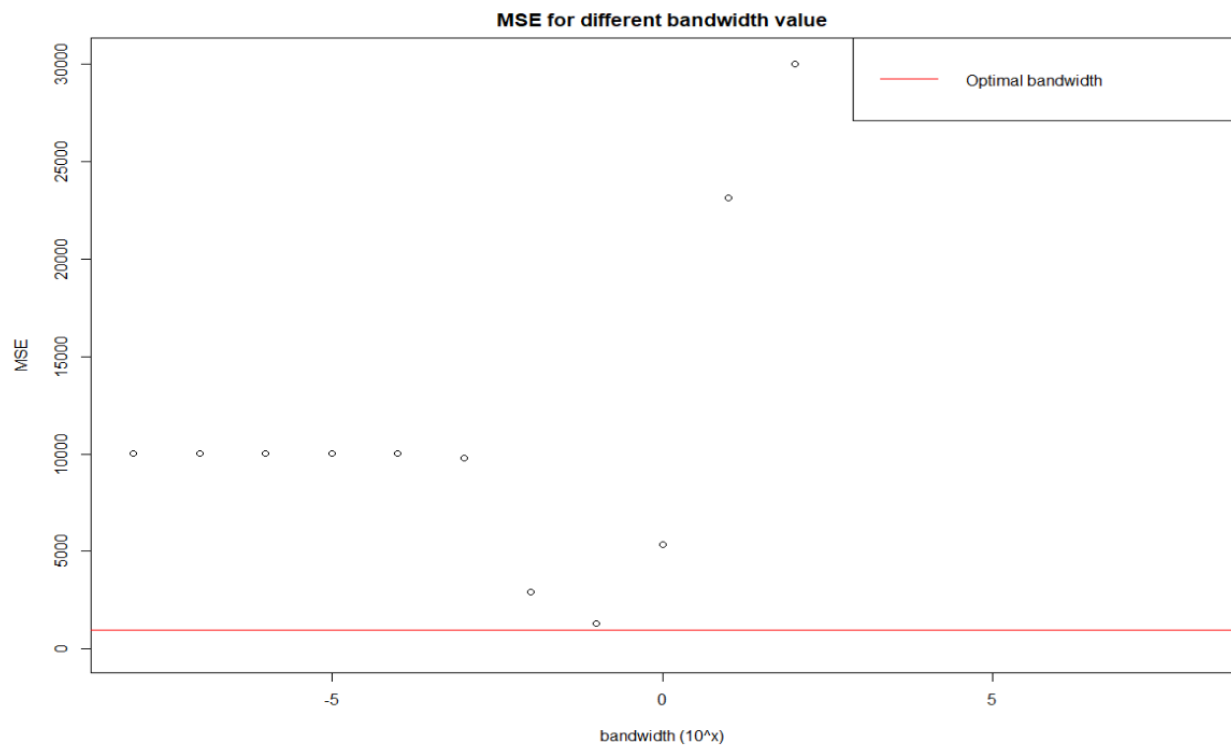

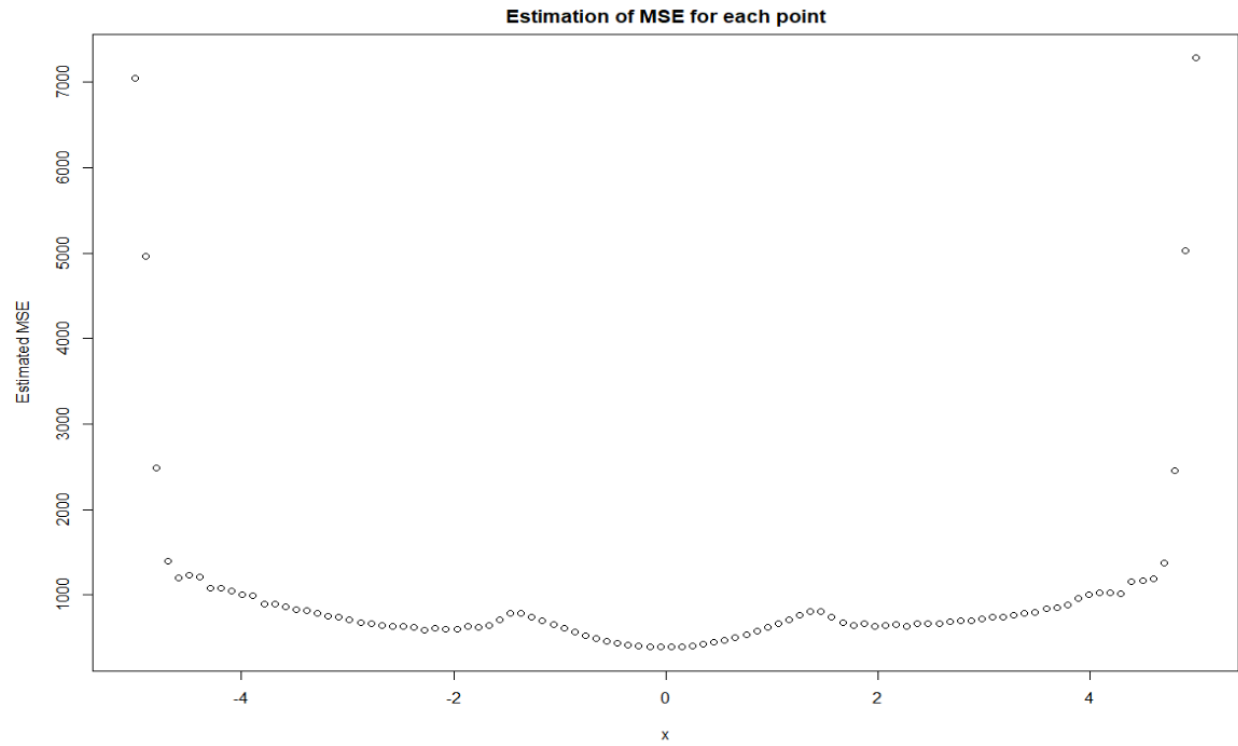

Fixed window (i.e the window does not depend on the bandwidth)

window = $0.8 \times \text{range of } X$

Window = $0.6 \times \text{range of } X$

Window = $0.4 \times \text{range of } X$
